

Abstract No 43

26/05/2017

**Title:** Ductile Iron Pressure Pipe for Trenchless Applications

**Theme:** New Products and Pipe Materials

Paul Stringer; paul.stringer@canadapipe.com; Canada Pipe Company | ;; | ;; |

**Abstract:** Ductile Iron Pressure Pipe for Trenchless Applications

Feature projects will include:

900mm dia. Bridge By-Pass using TR Flex / RJ DI Pipe – Kingston, Ontario

200mm dia. HDD - Stratford Ontario

300mm dia. Don Valley Parkway – Bridge Crossing along Eastern Ave., Toronto ON

450mm dia. Triple Force Main (ceramic epoxy lined) inside 1500mm Microtunnel pipe – Halton Region ON

The speaker will identify the major uses and benefits of Ductile Iron Pipe for water & waste water piping systems. Trenchless applications will feature HDD, MICROTUNNELLING with pipe in CASINGS, pipe BURSTING, pipe on SUPPORTS & BRIDGE crossings. Presentation focus will review advantages in strength, hydraulic performance, deflection capabilities etc.

Speaker: Paul Stringer / Ontario Manager / Canada Pipe Company
